## SUMMARY

**Full-stack developer with 4+ years of freelancing experience, eager to contribute to a collaborative team environment in a junior developer capacity. Expertise with React, NextJS, REST APIs, and full project lifecycle management.**

## EXPERIENCE

### Professional Freelancer & Independent Developer

June 2020 – Present

*RellSoft*

*Minneapolis, MN*

- Leveraged the RellSoft banner to spearhead significant self-directed full-stack JavaScript projects, primarily the TC4C e-commerce platform and a professional portfolio site.
- Managed the complete project lifecycle for TC4C (MERN Stack, Redux, PayPal API), from conceptualization and architectural design (including a major data model refactor for booking objects) through to successful deployment on Render (detailed in Projects section).
- Provided targeted HTML/CSS troubleshooting for email campaigns, ensuring cross-client compatibility for small clients.
- Explored game development concepts by creating two C# and Unity prototypes for game jam events, focusing on rapid development and problem-solving.

### Digital Content Reviewer

Oct. 2022 – Present

*Mackin Educational Resources*

*Burnsville, MN*

- Led quality assurance for digital content library, analyzing EPUB/PDF files and documenting technical issues using established testing frameworks
- Developed and maintained documentation for error tracking processes, improving team efficiency in content validation workflows

### Provisioning Installer

July 2016 – June 2020

*Trustwave*

*Eden Prairie, MN*

- Developed and maintained custom configuration scripts for enterprise firewall systems using shell scripting and Linux tools
- Managed remote deployments for 2,000+ locations, coordinating with technical teams and troubleshooting complex network configurations

## PROJECTS

### Trading Cards For Change (TC4C) | Technologies: MERN Stack, Redux

February 2024 – May 2024

- Engineered a major architectural overhaul, refactoring the data model from a product-centric to a booking-centric system with nested objects to accurately manage event reservations throughout the entire purchase lifecycle.
- Implemented secure user authentication using JWT, a checkout process using Paypal, and a fully-functional product management suite to create, update, and remove products from the store.
- Deployed as separate frontend and backend services on Render, ensuring scalability and maintainability.
- Enhanced user experience through significant UI/UX polishing, including header/navigation fixes, logo updates, improved cart interactions, smoothed transitions, and refined checkout page styling.

## TECHNICAL SKILLS

**Frontend:** React, NextJS, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Motion

**Backend (Primary):** Node.js, Express.js, MongoDB (MERN Stack), REST APIs, SQL

**Backend (Familiar):** C#, .NET Core

**Tools & Practices:** Git, Docker, Understanding of CI/CD principles, Jest/Vitest, Agile methodologies, Cloud Deployment (Render)

## EDUCATION

### Minneapolis College

*A.A.S. in Software Development*

Minneapolis, MN

*Sep. 2013 – May 2015*
